

Beauty in a Nutshell

ACE MAKEUP ARTIST SUPRITI BATRA TELLS US HOW TO LOOK BEAUTIFUL FOR A WINTER WEDDING IN A FEW SIMPLE STEPS, ALONG WITH SOME UPDATES ON THE LATEST BEAUTY PRODUCTS.

BY SWATI KHATRI

Every bride craves for that perfect look on her special day. The preparations that start at least six months in advance will not give the right effect if certain important things are not considered. So have a look at what the well known makeup artist Supriti Batra has to say to get that perfect look.

Basic Essentials

The most essential tip for winters is proper skin care and moisturisation. In winters your skin becomes dry easily so make sure to moisturise to start the canvas right. After all, why would you ever want to put makeup on dry skin? So Moisturise, Cleanse and Exfoliate, is the mantra of the season.

The Right Foundation

Right makeup starts with the right foundation. As your winter wedding function may last for long hours make sure you use a foundation that doesn't melt off. In this regard silicon based or high definition (HD) foundations are the right to be used.

Let Your Eyes do the Talking

No matter what, you never want your mascara or eyeliner to drip and dribble on your wedding day, it's a big day and you are going to cry at the end of it. So make sure you are coating your lashes and eyes in everything that is waterproof. Also go for powder eye makeup. It'll work in your favour!

Bright is Beautiful

Bright lips are something that work fantastically in winters. Whether it is bright red, coral or pink make your pout stand out!

As we have spoken about the right look for your wedding let's talk about the in vogue BB, CC & DD creams...

BB Creams

BB creams are short for beauty balms or blemish balms. This versatile skin care and makeup hybrid promises to do the job of five to six products; the moisturiser, primer, sunscreen, skin treatment, concealer, and foundation. The idea of this cream is that it's the only product you'll need after you wash your face.

CC Creams

These are Colour Control, Complexion Corrector or Colour Correction creams. Like BB creams they boast extensive skincare properties, SPF protection and semi-sheer coverage along with the added benefit of colour-correcting technology to improve uneven skin tones without a heavy or oily texture.

Get Ready for DD Creams

A "Dynamic Do-All" cream which is a kind of a BB and CC hybrid. Originally marketed as a heavy duty cream for body and feet; dubbed as 'Daily Defense' cream. Alongside the BB's skincare benefits and SPF and the CC's colour correcting credentials, the DDs have more of an anti-aging focus to diminish fine lines and wrinkles over time. These creams are going to hit the market soon. ■
